Overall Height:

1.875 inches

End Application:

3895-01-344-5480 - liquid bituminous material distributor

Accessory Components And Quantity:

Chain 1, protective cap 1, o-ring seal 1

Pressure Rating:

8500.0 pounds per square inch

Special Features:

Allows a hand inserted probe to enter a pressurized system and communicate with the fluid without leakage; contains a self-sealing, spring loaded check valve

General Description:

Seal is viton; port is connected by 0.125in. Male npt connector

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
