Body Material:

Bronze, astm b61

Body Style:

Straight thru

Stem Material:

Nickel copper alloy

First End Connection Type:

Unthreaded internal pipe

First End Style Designator:

Streamlined with one brazing ring

Second End Relationship With First End:

Identical

Second End Style Designator:

Streamlined with one brazing ring

Second End Pipe Size Accommodated:

1.500 inches

Seat Material:

Nickel copper alloy

Flow Control Device:

Diaphragm

Flow Control Device Material:

Rubber

End Connection Quantity:

2

Remote Actuation Method:

Diaphragm

End Application:

170' patrol coastal

Special Features:

Size 1.500 valve, class 250, type 1, no. 30

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A21100
