Overall Height:

6.750 inches

Overall Width:

7.500 inches

End Application:

Air loading panels, leslie controls, types pp-1 and ppf-1

Product Name:

Panel

Special Features:

Panel has o/a thickness of 0.125"

Material:

Aluminum

General Description:

Has holes for mounting a loading pressure gauge, a control pressure gauge and an air loader and four 0.3125" diameter holes at the corners for attaching the panel

Fsc Application Data:

Volume booster relay valve

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
