Body Style:

Angle

First End Connection Type:

Butt weld tube

First End Style Designator:

Beveled

First End Outside Diameter Tube Accommodated:

0.500 inches

Second End Relationship With First End:

Not identical

Second End Connection Type:

Butt weld tube

Second End Style Designator:

Beveled

Second End Outside Diameter Tube Accommodated:

0.375 inches

End Connection Quantity:

2

Capillary Tube Length:

180.000 inches

Bulb Length:

4.812 inches

Bulb Diameter:

0.625 inches

Temperature Adjustability:

Adjustable

Thermostatic Element:

Integral w/valve

End Application:

Ticonderoga class cg (47)

Temperature Rating:

Between 130.0 degrees fahrenheit and 155.0 degrees fahrenheit

Product Name:

Temperature pilot valve

Special Features:

Media, refrigerant r12, 22, 500, 502, and other non-corrosive refrigerant applications

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A21100
