General Description:

Shape cylindrical with separation plane, operating -10 psig to 60 psig, pressure proof 120 psi, burst 240 psig, temperature: ambient -65 degrees f to 165 degrees f, fluid -65 def f to 165 degrees f. Flow: 65 gpm pressure drop 1.0 psid max. Fluid: jp4, jp5, jp8. Fluid loss: 35 cc max. Test per at.P sym87-296, separation load: bending; 1030-1545 in lbs, end fitting per as 4395e16 to swivel 360 degs, length 5.180 that includes 0.250 in. For separation plane, diameter 2.500 max, 4 hour 0.277/0.283 in. Through, csink 0.510x100 degrees on plane, wt: 1.73 lbs max

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
