Overall Diameter:

3.000 inches

End Application:

W/s code maury class tags-39

Special Features:

Nha valve, iris

Special Markings:

Open position letter "o" stamped into coves; closed position letter "s" stamped into coves; part number stamped in metal face; air flow direction arrow stamped into housing

General Description:

3" diameter iris valve bead flange lever operated; valve operates satisfactorily in temp. Range-65degrees f to 600 degrees f; max. Torque req'd does not exceed 15 in-lb with upstream static press. Of 20 in of water on closed valve; complete valve assembly to be returned to idl for any repair or overhaul; complete valve assembly furnished as a spare part, no detail parts furnished as spares; patented valve - patent no. 2321336

Specification Data:

1fy-6-milstd-1388-2a/hd/ government specification and 1fy-6-mil-std-1561 (ships) /hd/ government specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
