Body Material:

Steel, corrosion resisting, qq-s-763, class 302, 303, 304, 305, 310, or 316

Body Style:

Straight thru

Media For Which Designed:

Petroleum base fluid

Flow Control Device:

Ball

End Connection Quantity:

1

Renewable Seat Ring Type:

Retaining ring

Mounting Facility:

Bolts or flange

Manual Control Method:

Lever

End Application:

Valve, vapor control, 50mm

Product Name:

Vapour control valve for gauging and sampling petroleum and chemicals

Special Features:

Bc-2 in micro b; bronze cap included; polytetrafluoroethylene ball; wt, 13lbs

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A21100
