General Description:

Tempertures ambient minus 65 f to plus 160 f, tempertures fluid minus 65 f to plus 135 f, tank pressure relative to ambient, operating minus 5 to 20 psig, proof 40 psig, burst 80 psig, internal pressure operating 0 to 190 psig, proof 180 psig, burst 360 psig, leakage internal 40cc/min max, external 0 to tank proof pressure, 0 from abient port, 0 to internal proof pressure total seal leakage shall not exceed 50cc/min life pressure port orifice flow 3 gpm at 40 porm 2 psid

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
