Body Material:

Aluminum

Body Style:

Screw-in cartridge

Furnished Items:

Automatic relief valve

Media For Which Designed:

Hydraulic fluid, mil-h-5606

Seat Material:

Rubber, buna-n

Flow Control Device:

Piston, bottom guided

End Connection Quantity:

2

Valve Discharge Flow Rate:

2.0 gallons per minute

Regulation Type:

Manual single stage

Tempurature Rating:

120.0 degrees celsius

Special Features:

Direct acting, spool type, internally piloted, externally drained, screw in cartridge pressure sequence valve; 2800 to 5500 psi; cracking pressure 50 to 450 psi; 10 size; cap adjustment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A21100
