**Body Material:**

Aluminum

**Body Style:**

Screw-in cartridge

**Furnished Items:**

Automatic relief valve

**Media For Which Designed:**

Hydraulic fluid, mil-h-5606

**Seat Material:**

Rubber, buna-n

**Flow Control Device:**

Piston, bottom guided

**End Connection Quantity:**

2

**Valve Discharge Flow Rate:**

2.0 gallons per minute

**Regulation Type:**

Manual single stage

**Tempurature Rating:**

120.0 degrees celsius

**Special Features:**

Direct acting, spool type, internally piloted, externally drained, screw in cartridge pressure sequence valve; 2800 to 5500 psi; cracking pressure 50 to 450 psi; 10 size; cap adjustment

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A21100
