Valve Discharge Flow Rate:

25.0 gallons per minute

End Application:

Regulator assembly, flow control manifold p/n 4820-0039-1

Valve Operation Method:

Hydraulic

Connection Type:

Threaded cartridge 1st end

Adjustable Pressure Range:

+150.0/+4500.0 pounds per square inch

Product Name:

Pressure relief valve

Special Features:

Z1 series t-10a tamper resistant cover; 1 valve-relief, cartridge type, standard sealed screw adjustment, 150-4500 psi, 0-25 gpm, viton seal;
1 pressure-test set-up for relief valve used in regulator assembly flow control aluminum block manifold

Style Designator:

Err-090

Furnished Items And Quantity:

1 cover and 1 gasket

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A046b0
