Body Material:

Steel, federal standard 66, aisi 303/sae 30303

Tempurature Rating:

400.0 degrees fahrenheit and -100.0 degrees fahrenheit

Media For Which Designed:

Any acceptable

First End Style Designator:

Flared

Flow Control Device:

Poppet

Opening Pressure Setting:

1.0 pounds per square inch

Tempurature Adjustability:

Not adjustable

End Application:

Los angeles class ssn

Product Name:

500 series adjustable popoff & inline relief valve

Special Features:

Goes on photonic mast. Adjustable cracking pressure factory pre-set @ 1psi designed to vent to atomosphere. Polytetrafluoroethylene seal material. End connection is 1/4in male straight thread as4395 (ms33656 with cone point removed- inlet only). Burst deflection cap not recommended for cracking pressures below 2psi.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A07100
