End Application:

Valve

Disk Type:

Composite

Disk Material:

Nickel and plastic

Burst Temperature:

72.0 degrees fahrenheit

Disk Size:

3.000 inches

Special Features:

3" atmospheric vessel (av) rupturable disk composite of nickel disk, klingersil gasket, polytetrafluoroethylene cushion and seal. Burst rating @ 9: 11.5 psid @ 72deg f.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A512v0
