Valve Discharge Flow Rate:

220.0 cubic feet per minute

Width:

1.500 inches all ends

Length:

4.000 inches all ends

Valve Operation Method:

Automatic or manual

Power Drive Operating Pressure:

5.0 pounds per square inch

Thickness:

2.630 inches all ends

Special Features:

Media - petroleum products and non-corrosives; fits 2-inch bung hole in steel and plastic drums; works on most drums

Material:

Copper alloy

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A046b0
