Body Material:

Steel, corrosion resisting

Body Style:

Tee

Second End Relationship With First End:

Identical

Seat Material:

Rubber, synthetic

Face To Face Distance:

6.312 inches

Third Connection Face To Centerline Distance:

2.125 inches

End Connection Quantity:

3

Temperature Adjustability:

Not adjustable

Maximum Inlet Pressure Rating:

700.0 pounds per square inch

Thermostatic Element:

Liquid immersion type

End Application:

Starboard console assembly

Temperature Rating:

95.0 degrees fahrenheit

End Connection Specification/std:

Sae o-ring seal

Product Name:

3-way thermostatic valve

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A21100
