End Application:

Marinepak unit, hfc-236fa, 300 ton 476-96253-002

Disk Type:

Composite

Disk Material:

Nickel and plastic polytetrafluoroethylene

Burst Temperature:

72.0 degrees fahrenheit

Disk Size:

2.000 inches

Special Features:

2" av (atmospheric vessel) rupturable disk, composite of nickel, klinger-sil gaskets, polytetrafluoroethylene cushion and seal; burst rate 9-11.5 psid @ 72 f

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A512v0
