Diameter:

4.560 inches

Pointer Purpose:

Open and shut

Case Material:

Copper alloy

Product Name:

Indicator disk

Special Features:

This is one of three major components of a mechanical position indicator on the gearbox/actuator for a 4" ball valve. This item has red enamel painted area that aligns with a indicator plate (find 173) with open/shut markings at 90 degrees to each other. The third component is a flange-like item called an indicator.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
