Body Material:

Aluminum and brass and steel, corrosion resisting

Body Style:

Straight thru

Tempurature Rating:

205.0 degrees celsius

First End Connection Type:

Threaded external tube

First End Thread Direction:

Right-hand

Second End Relationship With First End:

Not identical

Flow Control Device:

Stem and integral disk

Flow Control Device Material:

Brass, astm b16-60, 1/2h and aluminum and steel, corrosion resisting

End Connection Quantity:

2

End Application:

Oxygen concentration system

Product Name:

Vent relief valve

Special Features:

Flow rate in scfh 150.0, kd 0.04; set pressure range in psig 0.3 to 10.3 bar inline valve; seal material vinton

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A07100
