Valve Discharge Flow Rate:

10.0 gallons per minute

End Application:

Larc v

Valve Operation Method:

Hydraulic

Operating Temperature Rating:

200.0 degrees fahrenheit

Maximum Operating Pressure:

2500.0 pounds per square inch

Product Name:

Hydrostatic steering unit, hydraguide (tm)

Port Quantity:

4

Supply Pressure:

2500.0 pounds per square inch

Special Features:

Hga unit consists of a fluid control valve section and a fluid metering section that are hydraulically and mechanically inter-connected

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A508u0
