Valve Loading Method:

Spring

Outlet Pressure Accuracy Rating:

820.0 kilograms per square centimeter

Tempurature Rating:

150.0 degrees fahrenheit

Product Name:

Valve, relief

Special Features:

Per navy apl, relief valve 1771t, size 0.5 ips, set pressure 700psi, acc pressure 820 psi (max), reseal pressure 590 (min), inlet loss 147.5 psi, back pressure 70 psi, body material cuni, seat leakage none visible in 3 minutes at 590 psi, temp rating 150 degress f, capacity required 25 gpm, spring lever operation, union connections, bolted bonnet.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A21100
