Cross-sectional Shape:

Flat

Disk Type:

Scored

Burst Pressure:

9.0 pressure pounds per square inch absolute and 11.5 pressure pounds per square inch absolute

Product Name:

Rupture disk type av for atmospheric vessels

Disk Material:

Steel comp 316

Burst Temperature:

72.0 degrees fahrenheit

Disk Size:

2.000 inches

Special Features:

Dfars material

Furnished Items And Quantity:

2 gasket

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A512v0
