Overall Length:

168.000 inches

Overall Width:

48.000 inches

Product Name:

Containment mat

Special Features:

600 psi hydrostatic resistance; minus 60 to 212 degrees f temperature ranges; tripolymer alloy material; 4 ft. X 14 ft dimension

Functional Description:

Used as a effluent capture and containment system for aircraft wash water, engine cleaning and flushing, deicing operations, fueling and defueling, decontamination operations, ground support equipment, cleaning and maintenance and spill control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
