Product Name:

Inflation chamber

Special Features:

The only completely enclosed restraining device in the tire service industry; inflation chamber fully complies with osha standard which covers the safe service of single and multi-piece wheels; uses a patented pressure limiter and liquid-filled pressure gauges to deliver fast, accurate inflation while simultaneously ensuring protection of the operator; bullet proof polycarbonate windows on both sides offer safe observation of the entire inflation process; large enough for tires 51 inches tall and 23 inches wide; shuts off inflation automatically when the tire reaches a pre-set pressure; a bleed valve on the control panel allows the operator to immediately deflate the tire safely inside the chamber in the event of a problem

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
