End Application:

F/15a aircraft avionic systems

Special Features:

115.0/208.0 vac, 58.0/62.0 hz, 3 phase, 50.0 ampere input 1st input per phase; fault isolation, performance and alignment testing; computer controlled testing; readout devices consist of crt display and printer; input devices consist of keyboard and tape reader; integral computer; 32.500 in d by 90.000 in w by 77.250 in h, 2000 lbs

Functional Description:

Test station is used at depot lvl of maint to test digital modules and subassemblies from the avionic subsystems of the f/15a acft. When used inth uut test packages and test programs, this computer controlled test station provides the capability to performance test, fault isolate and align digital modules and subassemblies
