Design Type:

Leg

Special Features:

Used to quickly and accurately determine the performance and characteristics of rate gyros, angular accelerometers, guidance systems, and flight control systems, requiring precise angular oscillating motion/26.25in deep/49.90in high/23.40in long/115 volts ac/60hz

Material:

Aluminum and steel

Material:

Aluminum and steel

Reference Data And Literature:

To 33d3-10-35-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T361-g
