End Application:

Tf-41 aircraft engine

Nominalheight:

5.380 inches

Nominaldiameter:

14.500 inches

Special Features:

Company item name-fixture, base

Functional Description:

Used during high pressure compressor spacer machining

Reference Data And Literature:

T.O. 2j-tf41-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
