End Application:

An/apq-120 fire control radar

Functional Classification:

Aa-9.4

Special Features:

C/o rf voltmeter; rada-pulser; differential voltmeter; feed through panel; electronic counter; sweep oscillator; multimeter; efc if amplifier; test panel; dc power supply; ground plate; attenuator panel; control panel; oscilloscope; power control and monitor panel; power supply calibration panel: 73.500 in h, 62.190 in w, 45.150 in d; 115.0 vac, 60.0 hz, 3-phase

Functional Description:

Hthree bay console used at depot lelev maintenance to test and overhaul the following repairable units of the airborne fire control radar set an/apq-120; efc-if amplifier 19a3, and linear amplifier 17a1

Reference Data And Literature:

T.O. 33d5-12-195-1 and -1a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
