End Application:

B-1b aircraft linear electromechanical actuator

Nominallength:

8.000 feet

Nominalwidth:

2.000 feet

Nominalheight:

2.000 feet

Special Features:

C/o an upright, stationary, pneumatically powered system c/o two main sections, a base and a load fixture; company item name-fixture, load limit test

Functional Description:

Used load tests are performed to fault isolate and verify proper operation after repair; test require that tension and compression forces and displacements be imposed on the output rods of the actuators

Unpackaged Unit Weight:

500.000 pounds

Reference Data And Literature:

Serd's 1611, 12a18g; to 8a1-8-46-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
