Overall Length:

57.000 inches

Overall Height:

115.000 inches

Overall Width:

34.000 inches

End Application:

Bqm34f supersonic aerial target

Voltage In Volts And Current Type:

115.0 ac

Special Features:

Single phase power; 500lbs; skid mounted

Functional Description:

Used to compress the mars main parachute

Reference Data And Literature:

To 35d-1-292; navair 17-1-118

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
