End Application:

F-15 aircraft jet fuel starter hydraulic manifold 46340-4

Nominal length:

5.500 inches

Nominal width:

0.750 inches

Nominal height:

2.500 inches

Special Features:

Company name-holding plate

Functional Description:

Used during overhaul and maintenance of the jet fuel starter hydraulic manifold. It clamps to the body of a surge damper valve on the start pressure point. The holding plate is then clamped in a vise, holding the surge damper for torquing the end fitting

Unpackaged Unit Weight:

2.500 pounds

Reference Data And Literature:

Serd no. 1261; to 9h18-17-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
