End Application:

F-15 aircraft hydraulic servocylinder

Nominal length:

4.000 inches

Nominal width:

4.000 inches

Nominal height:

1.000 inches

Special Features:

Aluminum; company name-test block, electro-hydraulic valve

Functional Description:

Used to mount/hold the electrohydraulic servovalve and bypass door servo cylinder during testing; allows pressures to be applied and monitored

Unpackaged Unit Weight:

1.000 pounds

Reference Data And Literature:

Serd no. 2305; to 9h2-5-267-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
