End Application:

Aircraft instruments

Special Features:

Test set computer cycling

Functional Description:

Provides varying pilot and static pressure source to cycle the cpu-46/a altitude encoding computer and fault isolation in the event of malfunction; 22.0 in lg; 20.0 in w; 15.0 in h

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
