**Overall Length:**

179.000 inches

**Overall Height:**

36.000 inches

**Overall Width:**

25.469 inches

**Frame Material:**

Metal

**End Application:**

An/gpn-4, an/fpn-16

**Joint Electronics Type Designation System Item Name:**

Target

**Joint Electronics Type Designation System Item Type Number:**

Type no. Rr-36/g

**Reflecting Elementlength:**

36.000 inches

**Reflecting Elementwidth:**

25.469 inches

**Reflecting Elementheight:**

25.469 inches

**Reflecting Element Frequency Rating:**

Between 8500.0 megahertz and 9600.0 megahertz

**Reflecting Element Material:**

Aluminum alloy

**Reflecting Element Surface Treatment:**

Painted

**Frame Surface Treatment:**

Painted

**Usage Design:**

Target used to align ground radar to direct the aircraft

**Functional Description:**

Presents small target of large reflecting cross-section at known positions to act as an aid in adjustment of antenna beam angle and indicator map alignment; target is designed to give broad response only slightly affected by minor changes in angle of incidence

**Fsc Application Data:**

Radar set, radar search equipment, except airborne

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T222-b
