End Application:

F-15 aircraft secondary power subsystem

Nominalheight:

4.000 inches

Nominaldiameter:

7.000 inches

Special Features:

Steel; company name-holder, wheel press

Functional Description:

Used to hold a partial power turbine assembly while pressing a turbine wheel into place

Unpackaged Unit Weight:

4.000 pounds

Reference Data And Literature:

Serd no. 1631

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
