g
End Application:
F-15 aircraft secondary power subsystem
Nominalheight:
4.000 inches
Nominaldiameter:
7.000 inches
Special Features:
Steel; company name-holder, wheel press
Functional Description:
Used to hold a partial power turbine assembly while pressing a turbine wheel into place
Unpackaged Unit Weight:
4.000 pounds
Reference Data And Literature:
Serd no. 1631
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
