End Application:

Tf-39 aircraft engine

Nominalheight:

14.000 inches

Nominaldiameter:

18.000 inches

Special Features:

Company item name-fixture, machining

Functional Description:

Used during machining of the forward compressor rotor shaft

Reference Data And Literature:

T.O. 2j-tf39-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
