End Application:

Autopilot system pb10 and pb10a

Functional Classification:

Gg-7.2

Functional Description:

Used in testing amplifier and signal generator 15401, 15406, and 15408 used in the pb10 and pb10a autopilot systems. The test stand c/o a turn mechanism assembly, arm, yoke, and mtg frame. The mtg frame supports the amplifier and signal generator under test

Entry Date:

73-07-15

Reference Data And Literature:

To 33d3-2-33-4

General Description:

Ro/a dim: 15.000 in. Lg., 19.250 in. W., 29.500 in. H.; wt: 100 lbs; input voltage: 115 vac, frequency 60 hz, phase single; output characteristics: turn speed 36 degrees per min, 180 degrees per min, 360 degrees per min, 1080 degrees per min

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
