**End Application:**

J-57

**Reference Data And Literature:**

T.O. J-57-tf30-33

**General Description:**

To automatically bench check thermocouples at operation temperature with laboratory accuracy; checks 8 or 10 thermocouples simultaneously; self contained, solid state; simultaneous readout to permit instant comparison of thermocouple and heater probe temperature; automatic, internal, cold junction compensation and open thermocouple protection; tests thermal switches; 32 in. W; 16 in. H; 15 in. Deep

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
