**End Application:**

T-1084/apq-130

**Unpackaged Unit Length:**

46.000 inches

**Unpackaged Unit Width:**

73.000 inches

**Unpackaged Unit Height:**

80.000 inches

**Product Name:**

Transmitter cooling unit test station

**Special Features:**

Test station is an enclosed, three-bay unit. Includes coolant reservoir and two closed-loop coolant circulation circuits

**Functional Description:**

Test station provides for testing of transmitter cooling system of t-1084/apq-130, interfaces with xmtr cooling system to perform test functions as follows; coolant circuit evacuation; leakage determination; fill and pressurization; continuity tests; diode tests; coolant flow control; coolant temperature control; coolant pressure; control of airflow and determination of pressure drop across cooling system heat exchanger; calibration check of pressure and temperature switches; operation of differential pressure switches

**Reference Data And Literature:**

33da102-7-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fiig:**

A23800
