Overall Length:

2.959 feet

Overall Height:

3.875 feet

Overall Width:

2.959 feet

Assembly Form:

Rigid

End Application:

T-56 turboprop engine

Work Holding Device Position Adjustability:

Adjustable

Special Features:

Designed for propeller shaft and planetary gear

Reference Data And Literature:

To 2j-t56-24; navair 02b-5da-504

Departure From Cited Designator:

Nsne

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T361-c
