Overall Length:

88.125 inches

Overall Height:

18.000 inches

Overall Width:

8.500 inches

Frame Material:

Metal

Joint Electronics Type Designation System Item Name:

Radar target simulator

Joint Electronics Type Designation System Item Type Number:

Type no. Sm-104/gp

Reflecting Elementlength:

18.000 inches

Reflecting Elementwidth:

6.750 inches

Reflecting Element Frequency Rating:

Between 9000.0 megahertz and 9160.0 megahertz

Reflecting Element Material:

Steel

Reflecting Element Surface Treatment:

Painted

Frame Surface Treatment:

Painted

Fsc Application Data:

Radar sets, nonairborne, except fire control and guided missile

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T222-b
