End Application:

F-15 acft

Maximumlength:

18.000 inches

Maximumwidth:

10.000 inches

Maximumheight:

10.000 inches

Special Features:

Aluminum and steel; power-90-110 psi shop air; 28 vdc

Functional Description:

Used to provide a means to regulate and monitor applied loads to the dc electro-mechanical actuator that operates the two position rudder travel linuter mechanism during bench testing

Reference Data And Literature:

Serd no. 2592

Supplementary Features:

Company name-panel, contrl actuator, dc linear

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A31700
