End Application:

F-15 aircraft azimuth hydraulic servovalve series 258621 and 258622

Nominal length:

5.400 inches

Nominal width:

2.750 inches

Nominal height:

1.250 inches

Special Features:

Steel; company name-fixture, adjusting, spool stop

Functional Description:

Used as providing a means of holding hydraulic research servo valve and adjusting the metering plugs and spool travel to obtain the proper flow after the servo valves are assembled

Unpackaged Unit Weight:

3.000 pounds

Reference Data And Literature:

Serd no. 2609; to 9h8-14-302-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
