End Application:

F-15 aircraft elevation hydraulic servovalve 258622

Nominal length:

3.500 inches

Nominal width:

3.000 inches

Nominal height:

2.350 inches

Special Features:

Steel; company item name-fixture, nozzle pressure

Functional Description:

Used to press the nozzles into the body of the hydraulic research electrohydraulic servo valves, p/n 22232530 and 22232520 and to seal off the nozzle bores during adjustment

Unpackaged Unit Weight:

1.500 pounds

Reference Data And Literature:

Serd no. 2610; to 9h8-14-302-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
