End Application:

F-15 aircraft external tank pressure vent valve

Special Features:

28 vdc power circuit; to name: pneumatic control test panel

Functional Description:

Rused to check various ecs air flow amdulating and shut off valves. When used with holder also checks leakage flow rates, functional flow rates, proof pressure, air temperature, and current bs flow rate characteristics

Reference Data And Literature:

Serd no. 0760; to 33d2-12-7-1; 6j15-8-125-3

Supplementary Features:

Company name-test stand valve calibration

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
