End Application:

Aircraft propeller controls

Nominal length:

1.500 inches

Nominal width:

1.380 inches

Nominal height:

1.500 inches

Special Features:

Fixture, spring compression

Functional Description:

Used to compress torsion spring prior to installation

Reference Data And Literature:

To 3ha2-7-3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
