Ac Voltage Rating:

115.0 volts

Frequency Rating:

400.0 hertz

End Application:

F4c aircraft test equipment

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Frequency

Phase:

Single/three

Special Features:

Characteristics are 45 lbs weight& 12 inches depth; 19.6 inches length; 12.1 inches width

Functional Description:

Used for functional testing, troubleshooting and calibration of the frequency control box of the f-4cacft

Reference Data And Literature:

To no. 33d2-27-27-1

Type/model Designation:

An/asm-91

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
