**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

400.0 hertz

**End Application:**

F4c aircraft test equipment

**Electrical Power Source Relationship:**

Operating

**Inclosure Feature:**

Multiple item w/housing

**Test Type For Which Designed:**

Frequency

**Phase:**

Single/three

**Special Features:**

Characteristics are 45 lbs weight& 12 inches depth; 19.6 inches length; 12.1 inches width

**Functional Description:**

Used for functional testing, troubleshooting and calibration of the frequency control box of the f-4cacft

**Reference Data And Literature:**

To no. 33d2-27-27-1

**Type/model Designation:**

An/asm-91

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T228-a
