End Application:

B-58 aircraft age.

Functional Classification:

Bb-3.4

Functional Description:

Designed to test the filtering efficiency and cleanliness of all permanent-type filter elements (pneumatic, hydraulic, fuel, and oil) on the b-58 and its aerospace ground equipment

Entry Date:

70-04-01

Reference Data And Literature:

T.O. 33a2-2-34-1 and report no. Fse-4-101 engineering data for age, ref no. 2012 (general dynamics/fort worth)

General Description:

Ainput power: 115 vac, 60 cps; o/a dim: 84.000 in. Lg., 27.000 in. W., 73.000 in. H.; approx wt 700 lbs; c/o two identical, simple pneumatic circuits which utilize shop air as their main test medium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
