| End Application:                                    |
|---|
| Tf41 aircraft engine                                |
| Product Name:                                       |
| Adapter, lifting, Ip turbine rotor assembly aft end |
| Special Features:                                   |
| Company item name-adapter, lifting                  |
| Functional Description:                             |
| Used during lifting of lp turbine rotor assembly    |
| Reference Data And Literature:                      |
| To 2j-tf41-4  |
| Shelf Life:   |
| N/a   |
| Unit Of Measure:                                    |
|   |
| Demilitarization:                                   |
| No  |
|   |
